# CHAPTER 1

## ADOT EQUIPMENT SERVICES — WHAT WE DO

### **Welcome**

ADOT Equipment Services (EQS) is your service provider for vehicle maintenance, repair and emission-related services. Our mission is to keep your vehicle safe and reliable. Our shop facilities have state-of-the-art equipment. The majority of our technicians are Automotive Service Excellence (ASE) certified, and are experts in the automotive, truck and heavy off-road fields.

Please feel free to call one of our repair shops directly to schedule an appointment for service. (Appendix A-1)

ADOT Equipment Services is headquartered in Phoenix, Arizona, with 20 additional shop locations around the state. (Appendix A-1)

**EQS requests the following assistance from our customers:**

**Read this handbook.**

### **Preventive Maintenance (PM) Appointment**

Your vehicle should be serviced in accordance with the preventive maintenance cycle established by your agency fleet management department. The EQS PM Program includes a comprehensive inspection of the vehicle for proper operation and general safety. During your PM Service, we will thoroughly inspect the vehicle for items requiring repair.

Please check the mileage and date for the next service indicated by the colored sticker in the upper left corner of your windshield to see if you are approaching a required service interval.

### **Repair**

If you decide to wait for your vehicle during a service or repair appointment, and additional non-safety related repairs are required, you may be asked to reschedule your vehicle for the additional required repairs. If the item is safety related, the vehicle must be repaired before it is returned to service.

If something seems to be wrong with your vehicle, bring the vehicle to the EQS repair shop; no appointment is necessary. (Appendix A-1)

If your vehicle requires extensive repair, please note that the EQS repair shops will contact your agency fleet management department for authorization.

**Note:** Before taking your ADOT vehicle to a commercial vendor for maintenance or repair, you must contact the nearest EQS repair shop for authorization.

### **Vehicle Repair Status**

Please contact the EQS repair shop where you dropped off the vehicle for an update on repairs. Equipment Services will do everything possible to provide daily repair status reports.

### **Tires**

The operator is responsible for ensuring that the vehicle has a functional spare tire and necessary tire changing tools. Please review your agency's fleet policy or contact your fleet manager regarding the policy on changing flat tires. Refer to your vehicle owner's manual for specific vehicle information on spare tire changing instructions.

## **Vehicle Rental**

### **For ADOT Users:**

In the Phoenix area, ADOT employees can rent a vehicle at the ADOT Automated Motor Pool. Please call 602.712.7059 for more information.

### **All Other Agencies:**

The Arizona Department of Administration (ADOA) operates a full-service vehicle rental office and fueling depot located at the ADOA Motor Pool, 1501 W. Madison St., Phoenix, AZ. Call 602.542.3110 for more information.

## **Customer Service Survey and Complaints**

All EQS customers will receive a customer service survey via email each time a vehicle is serviced or repaired. As part of our continuous improvement efforts, we encourage all of our customers to complete this survey.

### **For questions or concerns, please contact:**

ADOT Equipment Services  
Maintenance Operations Manager  
2225 S. 22nd Ave., Mail Drop 071R  
Phoenix, AZ 85009-6997  
602.712.6711

## **Vehicle Emission Testing**

All vehicles assigned in Maricopa and Pima County must be emission tested in accordance with Arizona state law. Prior to taking the vehicle to the testing station, the vehicle operator must obtain an emission inspection coupon. Coupons can be obtained from the following EQS repair shops: Phoenix Service Center, Phoenix Capitol Mall, Game and Fish, Mesa, Avondale and Tucson.

After the vehicle passes emission testing, the vehicle operator must present the Vehicle Inspection Report Compliance Certificate to the EQS repair shop that issued the emission inspection coupon.

If the vehicle fails emission testing, immediately turn in the vehicle to the nearest EQS shop for repair, along with the Vehicle Rejection Notice with emission testing results and the reason for the failure.

### **For ADOT Users:**

If EQS takes the vehicle to the emissions testing station, labor hours will be billed to the user.

### **All Other Agencies:**

- Operators must check with the respective agency fleet manager to determine where to obtain emission inspection coupons.
- The vehicle operator is responsible for taking their vehicle to an emissions testing station.

## **Car Wash Services**

Car wash services are available to our customers in the Phoenix and Tucson repair shops for cars, vans, and light trucks. We recommend you call ahead to confirm the car wash is available. In Phoenix, call 602.712.7044; in Tucson, call 520.838.2861.

**NOTE:** EQS uses contracted prison inmates to provide car wash services. All Department of Corrections restrictions apply; all valuables and weapons must be removed from the vehicle.

# CHAPTER 2

## VEHICLE OPERATOR RESPONSIBILITIES

### **Use of State-owned Vehicle**

State-owned vehicles will be used only for official state business in accordance with state laws, rules and regulations. Check your agency specific “vehicle use policy” prior to operating a state vehicle. All state drivers of state vehicles are responsible for knowing the state laws, rules and regulations governing the use of state-owned vehicles. GPS fleet systems may be connected to the vehicle — operators should not feel a sense of privacy when operating a state vehicle.

State-owned vehicles are to be stored overnight at state office locations, crew headquarters, or at the location where an employee is lodged overnight while on travel status. Any exceptions must be authorized by the agency fleet manager.

A driver must be 18 years or older, legally responsible for his or her actions, and subject to the agency’s direction and control.

Family members, friends and pets of drivers shall not ride in state vehicles.

**Note:** No hitchhikers are permitted in any state-owned vehicles.

### **Obligation of the Law**

State-owned vehicles shall obey all state traffic laws.

**Note:** The operator of a state-owned vehicle is solely responsible for all traffic infractions received while operating the vehicle.

### **Safety**

State vehicle drivers are responsible for the safe operation of state-owned vehicles at all times. The most important safety factor in transportation is you, the driver.

### **Courteous State Drivers**

State vehicle drivers are highly visible to the public and as such are the window of state government business. The privilege of driving publicly funded vehicles also gives you the opportunity to be examples of courtesy, safety and observance of the law.

### **Vehicle Security**

Safeguard the vehicle, credit card and keys against theft or misuse. Lock all articles of value in the trunk or take them with you when you leave the vehicle. Report vandalism and lost, damaged or stolen credit cards, license plates and keys as soon as possible to your supervisor.

### **Vehicle Care and Maintenance**

You play an important role in maintaining assigned vehicles in a safe, operable condition. You can help make sure the vehicle receives the regular care it needs. If any aspect of the vehicle’s performance concerns you, bring the situation to the attention of the nearest EQS repair shop or your agency fleet manager.

# CHAPTER 3

## WHERE AND HOW TO OBTAIN FUEL

There are two procedures to obtain fuel.

### 1. ADOT AGENCIES ONLY

- Driver must be an ADOT employee.
- ADOT fuel sites are available to all state, county and local government agencies that have active fuel agreements (IGA or ISA) with ADOT.
- A list of all ADOT fuel locations is provided in Appendix B-1.
- All state agencies are strongly encouraged to use the state's network of ADOT fuel sites. By using fuel purchased under state contract, you save all taxpayers a significant amount of money.
- In order to establish a new personal identification number (PIN) code, it must be done at the fuel island dispenser/card reader, not at a gate.

**Note:** When using the Phoenix ADOA Motor Pool fuel island to create a new PIN code, drivers must use hoses 1, 2, 5 or 6.

### Gate Access

- ADOT Employee Identification Number (EIN) is required for gate access.

### Before Fueling

- Turn the engine OFF and **do not** use your cell phone while fueling your vehicle.
- Please be sure you are using the correct method when obtaining fuel at the station.
- Verify your PIN prior to traveling. If you forgot your PIN, you will need to re-establish a new one. Contact ADOT Fuel Management at 602.712.6526.

### Fueling Instructions with established PIN

1. Press **ENTER** on touchpad to begin.
2. Enter the vehicle's current odometer or hour meter reading and press **ENTER**.
3. Enter vehicle number and press **ENTER**.
4. Enter your 10-digit Driver ID and press **ENTER**.  
(Driver's current 6-digit EIN and 4-digit PIN).
5. Enter the hose number for the pump you will be using and press **ENTER**.
6. Begin fueling.

### How to Establish a PIN for a Driver ID

1. Press **ENTER** on touchpad to begin.
2. Enter the vehicle's current odometer or hour meter reading and press **ENTER**.
3. Enter vehicle number and press **ENTER**.
4. Enter Driver ID (6-digit EIN — if your EIN is 5 digits, enter a leading zero) and press **ENTER**.
5. Enter the hose number for the pump you will be using and press **ENTER**.  
Message "**BAD DRIVER ID**" along with smaller print "**ENTER DRIVER ID WITH NEW PIN CODE**" appears on the screen.

6. Enter driver's 6-digit EIN followed by 4-digit PIN of your choosing (alpha/numeric combination allowed) and press **ENTER**.  
**This is your new 10-digit DRIVER ID.**  
Message "*BAD DRIVER ID*" "*CONFIRM DRIVER ID WITH NEW PIN CODE*" appears on the screen.
7. Again enter your 10-digit Driver ID and press **ENTER**.  
Screen should show "*BAD DRIVER ID*" message with "*PIN CODE UPDATED*" in smaller print.
8. Again enter your 10-digit Driver ID and press **ENTER**.
9. Begin fueling.

## 2. **NON-ADOT VOYAGER CARD AGENCIES**

- Voyager cards: The State of Arizona is contracted with Voyager Fleet Systems Inc. to offer agencies the option of using a fleet card to purchase fuel at ADOT or at retail stations.
- Your agency will need to establish an account with Voyager Fleet Systems Inc. by calling 800.987.6591.
- The same Voyager card can be used at an ADOT fuel location to purchase fuel at significant savings over retail cost.
- All drivers from other agencies will need Voyager cards to activate the ADOT fuel pumps.

### **Gate Access**

- Voyager card is required for gate access where applicable — operators should call specific yards prior to traveling to ensure after-hour gate access is available.

### **Voyager Card Fueling Instructions at ADOT Fuel Site**

1. Insert and remove Voyager Fleet Card face up, "Arizona" on the right.
2. Enter your vehicle's current odometer or hour reading and press **ENTER**.
3. Enter vehicle ID (as instructed by your agency) and press **ENTER**.
4. Enter the hose number for the pump you will be using and press **ENTER**.
5. Begin fueling.

**Note:** Please contact ADOT Equipment Services Fuel Systems Management at 602.712.6526 with fueling problems or questions.

# CHAPTER 4

## VEHICLE ACCIDENTS — WHAT TO DO

### **ADOT Vehicle Crash Reporting Instructions**

- Safely move off mainline if possible
  - Activate hazard lights on state vehicle
  - Place flares, flags, cones, if appropriate - reduce hazards to prevent secondary crashes
  - Offer assistance – check for injuries
- Notify local law enforcement
- Refer to the ADOT accident packet located in the glove box
  - Distribute and collect witness information cards
  - Provide other driver with state vehicle insurance information
- Secure other driver information – name, address, insurance carrier name with policy number
- Notify your supervisor
- Complete the Auto Loss Report – available at the ADOTNet – and submit as instructed as soon as possible – and no longer than within 10 days
- Call ADOT Safety & Risk Management (602.712.7327) immediately for events resulting in injury or significant property damage
- PLEASE DO NOT:
  - Comment on fault or liability
  - Argue or debate
  - Discuss the event with anyone except law enforcement authorities and/or State of Arizona personnel with a need-to-know

### **All Other Agency Accidents**

- Notify appropriate personnel as per agency policy

# CHAPTER 5

## VEHICLE BREAKDOWNS — WHAT TO DO

### **Breakdown Procedures**

In the event of a breakdown, your first responsibility is your own safety. Please move your vehicle off the road as safely as possible.

If any dash warning light comes on, safely pull over, shut off the engine and contact the nearest EQS repair shop (Appendix A-1) or the 24-Hour Roadside Assistance Hotline (877.800.8520) as soon as possible for direction.

### **During Normal Working Hours**

To request vehicle breakdown service Monday through Friday during normal working hours, use the following procedures:

- Call the nearest EQS repair shop closest to your location. (Appendix A-1)
- Call your agency fleet manager and/or supervisor to advise them of your status.

### **After Normal Working Hours**

To request vehicle breakdown service Monday through Friday after normal working hours, and on weekends and holidays, use the following procedures:

- Call the 24-Hour Roadside Assistance Hotline at 877.800.8520.
- The 24-Hour Roadside Assistance Hotline representative will arrange for a tow truck to be dispatched to your location. In most breakdown cases, the vehicle will be towed to the nearest EQS repair shop.
- Please call your agency fleet manager and/or supervisor to advise them of your status.
- You may ride in the tow vehicle to the nearest EQS repair shop.
- You are responsible for your transportation from the EQS repair shop.
- At the time of service, you are not expected to pay for the services rendered.
