
328 Roundabout Yield To Trucks Sign Installation

The purpose of this Guideline is to develop a uniform application in regards to the installation of the “Roundabout Yield To Trucks” sign at roundabout intersections. This Guideline is provided to satisfy the requirements of the Arizona Revised Statutes (ARS) 28-729 and ARS 28-778.

The “Roundabout Yield To Trucks” Sign (W16-18) should be installed under the YIELD sign at all approaches of roundabouts. The sign should not conflict with any regulatory or warning signs or reduce the sight distance for pedestrians or drivers at the roundabouts. In the event a conflict exists, alternative locations for installation must be selected.

Please see below a display of the assembly of the two signs, the YIELD and the “Caution Yield to Trucks”.
